This document provides information for the DTe v3.1.7 release that includes enhancements to improve performance of the DTrade system.

Overview of DTe v3.1.7 Changes

The purpose of this release is to implement system enhancements for DTrade External (DTe), batch submission processing and DSP Forms.

Changes

v3.1.7

DT2e Changes

Updated	<p>DTe and DSP Form Version Update</p> <p>DTe version will be updated to 3.1.7</p> <p>The following form versions are updated:</p> <ul style="list-style-type: none"> DSP-5 8.5 to 9.0 DSP-6 8.3 to 9.0 DSP-61 8.5 to 9.0 DSP-62 8.3 to 9.0 DSP-73 8.6 to 9.0 DSP-74 8.4 to 9.0 	12369, 12370, 12371, 12372, 12373, 12374, 12375, 12376
Updated	<p>DTe Batch Schema Update for DSP61 and DSP73</p> <p>The DTe batch schema now allows DSP-61 and DSP-73 submissions with incomplete address field values for foreign countries. The schemas were modified so that the “foreignLocationType” require at least one country code. The updated schema validation traps schema errors of this type and provides a clear message describing the problem to the users.</p>	11526
Updated	<p>DTe Batch Signature Error Bug Fix</p> <p>Batch industry user could not retrieve their submission status when their submission was processed with a signature error. The fix now ensures that all submissions, including submissions with signature error, are properly associated with the submitter company.</p>	11632
Updated	<p>Form Submission Process Improved to not Allow Blank Spaces</p> <p>The forms were updated to improve the quality of data collected. The forms now prevent blank values for required fields.</p>	11663
Updated	<p>Enhance Track Status Page Functionality</p> <p>The enhancement improves the usability of the existing industry user track status page. User can now search by case type “ALL” to retrieve the case status for all their submitted cases.</p>	12368

Updated	<p>Remove Unused Statuses from the Selection Drop Down List on the Status Page</p> <p>'New', 'Not Assigned', 'Staffed', "Staffing Complete", and 'Assigned' have been removed from the drop down list.</p>	12386
Updated	<p>Enhance DTrade Track Status Compatibility to IE 11</p> <p>The application is now compatible with IE11, and known compatibility issues, including the script for date validation on both industry user and admin track status pages, have been corrected.</p>	11678
Updated	<p>Batch Amendment with Commodity Description Change Triggers Total License Value Validation Rule Error</p> <p>The batch validation of the commodity description now will no longer trigger Total License Value validation.</p>	12307
Updated	<p>Batch Submission Schema Validation Error Is Not Detailed Enough</p> <p>When a case fails because the commodity description is greater than 500 characters the error message states that it is a schema issue without specifying the field or displaying the actual error. This has been corrected so that the error message clearly communicates that the commodity description cannot be more than 500 characters long.</p>	12359
